ProSidian Consulting is a nationally recognized management consulting firm. ProSidian uses a practical and collaborative approach to advance sustainable and healthy building design and construction practices. The firm's clients include design firms, as well as public, private, and nonprofit building owners and developers, representing a variety of building types including institutional, educational, commercial, industrial, mixed-use, and residential developments.

 **SUSTAINABILITY STRATEGY, METRICS, REPORTING, DEVELOPMENT, AND IMPLEMENTATION REPORTING SOLUTIONS** – The ProSidian unbiased, 3<sup>rd</sup> party consultative approach is known for helping our clients move beyond mere compliance to high-performance profitability. We specialize in helping companies identify unique business opportunities to drive top line performance.

 **RISK MANAGEMENT, ONGOING MONITORING AND ADVISORY** - ProSidian leads the way in structured commodity risk mitigation programs that bring clarity to managers about their exposures and how to contain market uncertainty within acceptable limits. With extensive experience and time-tested tools and systems, ProSidian brings greater rigor and lucidity to the often paralyzing effect that market volatility has on utilities and energy-intensive industrials. Our comprehensive solution suite dramatically improves risk mitigation and includes.

 **RESOURCE REDUCTION, UTILITY BILLING / TARIFF ANALYSIS, MAINTENANCE, AND INVOICE MANAGEMENT** - ProSidian works closely with each client to help craft highly personalized programs, leveraging our time-tested, pragmatic experience in lean manufacturing, energy and resource efficiency, renewable energy technologies and quality management. These services typically assist companies in achieving their goals of reduced impact on the environment, measurable cost savings and a competitive advantage in an increasingly aggressive market.

 **INCENTIVE CAPTURE, UTILITY INCENTIVE DISCOVERY AND VALIDATION** - ProSidian explores Federal Green Tax incentive verification and certifications for every opportunity, then helps leverage every available Federal, State, and local incentive to further impact the bottom line. Whether a past, current, or future project requiring improved project ROI, ProSidian provides. This includes cost segregation, abandonment studies, engineered insurance appraisals, historical tax credits, new market tax credits, R&D tax credits, and more.

 **CLIMATE CHANGE + CARBON MANAGEMENT STRATEGY DEVELOPMENT AND IMPLEMENTATION** - ProSidian realizes that rising energy costs are driving organizations to be more efficient with energy use and related greenhouse gas emissions. At the same time, the growing asset value of carbon is creating opportunities for businesses to generate additional revenue streams. Our multidisciplinary

team of industry specialists can help your company manage its contribution to climate change proactively with a customized program designed to drive Energy & Sustainability and financial performance. Climate change/carbon voluntary markets and regulatory compliance starts with a carbon baseline and mitigation of risks related to climate change requires adaptation to regulation with strategies unique to each organization.

---

ProSidian Consulting helps our clients navigate complex decisions for energy and energy intensive assets and corporate enterprises from strategy development and implementation support to ongoing management of energy consumption.

We have long been a steadfast presence the Energy & Sustainability industry with over 15 years of proven experience. ProSidian experts have developed a portfolio of energy services which are fast becoming the most sustainable approach to reduce energy costs, implement sustainability strategies, manage risks, manage energy usage, and develop strategies for Climate Change + Carbon Management.
